Spriano SmartCom

Description
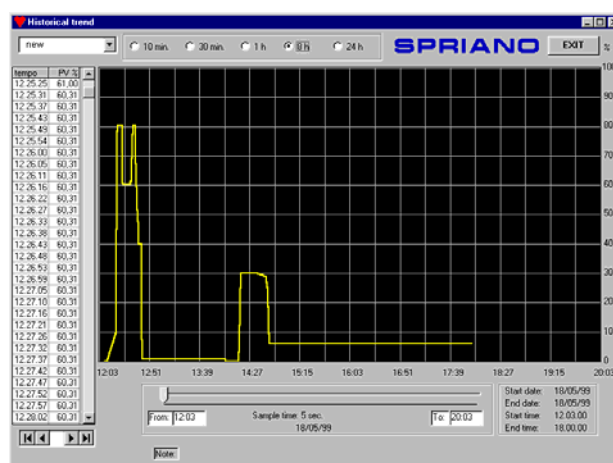

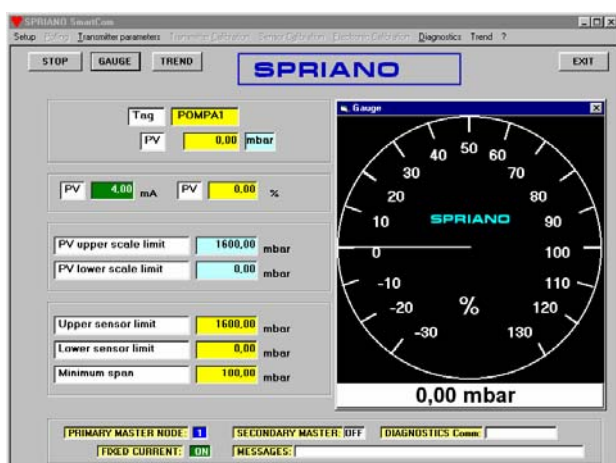

Specially developed for SST series Instruments, Spriano "SmartCom" software allows to use all SST7X transmitters functions.

Using an RS232 or a USB to Hart Interface (provided separately) it is possible to communicate in an easier and effective way than using a Hart Hand Held Terminal.

"SmartCom" works under Windows® (Win 95®/Win 98®/Win Me ®/Win XP®/Vista®)

Here are listed the main features:

- *User Friendly Graphics Interface*
- *On line Help*
- *PV Monitor*
- *Real Time Trend*
- *Historical Trend*
- *Storage of Configuration Data*
- *Transfer to Device of Stored Configuration*
- *Multidrop Communication*
- *Configuration Functions:*
    - ☞ *Calibrated Range Change*
    - ☞ *Analog Output Calibration*
    - ☞ *Engineering Units Selection*
    - ☞ *Sensor Calibration*
    - ☞ *Transfer Function Change*
    - ☞ *Reading/Writing Device Data*
    - ☞ *Diagnostics*
